

Only one iPhone can hold the band.

Family stays. Same 6-letter code. Nobody leaves. Move Bluetooth first, then tap take-over. Dummy name Alex, dummy code QKRMVT — never send a real name or code.

1 Phone with the band

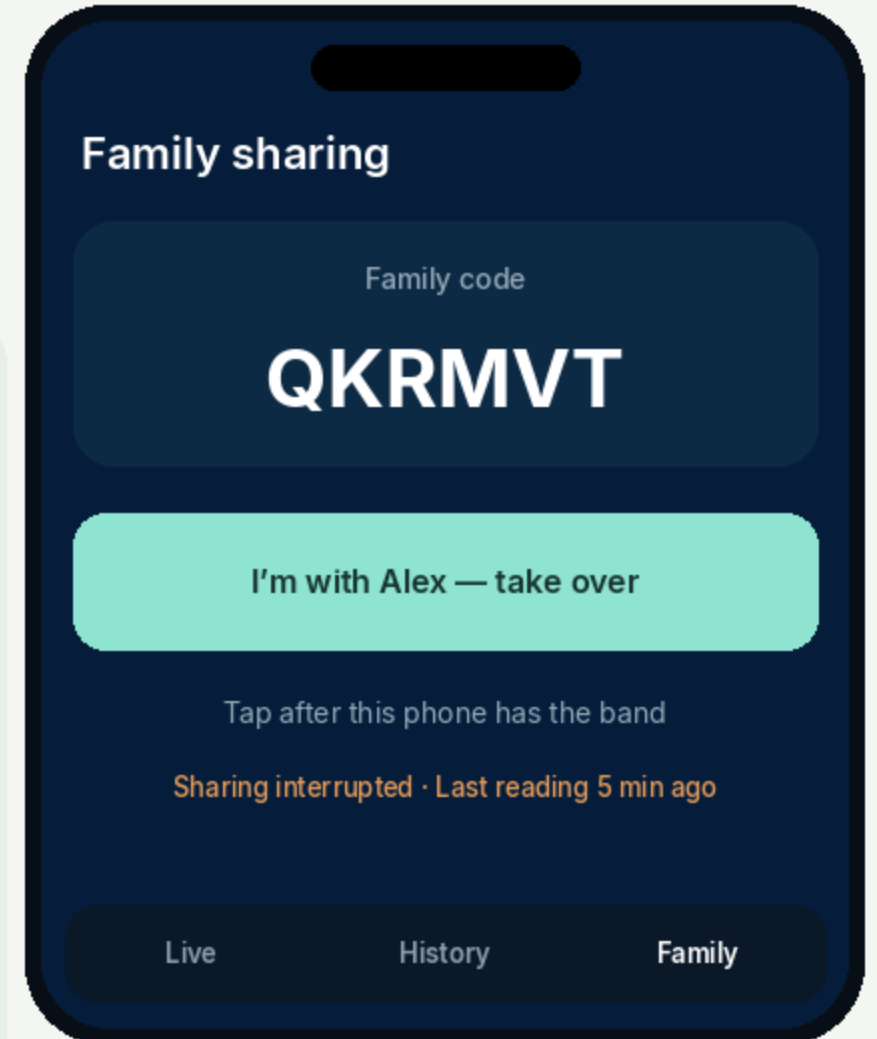

- Device → Disconnect.
- The next phone cannot connect while this one still holds the band.
- Optional: Family sharing → Stop monitoring. Family stays.

2 Phone taking over

- Stand next to the band.
- Device → Scan → connect.
- Wait on Live until a heart rate shows on this phone.
- Family sharing → I'm with Alex — take over.

3 Everyone else

- Do not connect to the band. Keep watching Live.
- Numbers should move again within a few seconds, including battery.
- If they still see Sharing interrupted, this phone is not hosting yet.

If take-over is refused

Orange: "Only the nursery or a carer can send live readings." Account → Leave this family → join the same code as Me or Carer → take over. Build 114 removes this step.

Share this sheet — not a live screenshot

Only one iPhone can hold the band.

Same family code. Nobody rejoins.

Disconnect the old phone, connect the new one, then tap take over.

1

Old phone

Device → Disconnect. Optional: Stop monitoring. Family stays.

2

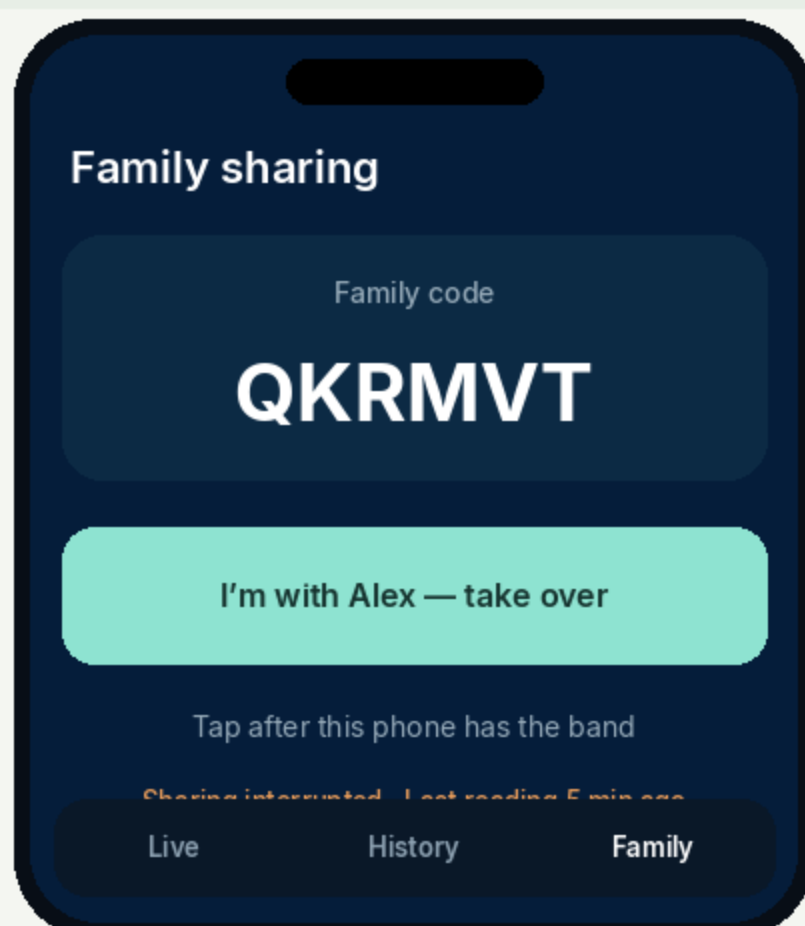

New phone

Scan, connect, wait for a heart rate on Live, then I'm with Alex — take over.

3

Watchers

Do not connect to the band. Live should move again, with battery.

If take-over is refused

Leave this family, join the same code as Me or Carer, then take over. Build 114 removes this.
